Contents of Volume 9

No. 1, January 1989

A numerical method to determine minimal inhibitory concentrations (MICs) of antibiotics directly from disc-diffusion susceptibility tests (JMM 00280)
T. E. Awerbuch, L. Lustman and J. M. Piret (USA) 1
Improved procedure for physiological characterization of microorganisms from diverse environments (JMM 00281)
B. A. Frederick and D. A. Klein (USA) 9
Utility of radiotracer activity measurements for subsurface microbiology studies (JMM 00282)
T. J. Phelps, D. B. Hedrick, D. Ringelberg, C. B. Fliermans and D. C. White (USA) 15
A rapid method for the isolation and identification of *Rhizobium* from root nodules (JMM 00283)
G. A. Beattie and J. Handelsman (USA) 29
Improved procedure for the transformation of the entomopathic microorganism *Bacillus sphaericus* 1593 (JMM 00284)
L. D. Taylor and W. F. Burke, Jr. (USA) 35
Measurement of cAMP in *Themomonospora curvata* by anion exchange HPLC (JMM 00285)
L. Gerber and F. Stutzenberger (USA) 41
A plate for primary screening of lipase activity (JMM 00286)
M. Y. A. Samad, C. N. A. Razak, A. B. Salleh, W. M. Zin Wan Yunus, K. Ampon and M. Basri (Malaysia) 51
Profiling, structural characterization, and trace detection of chemical markers for microorganisms by gas chromatography–mass spectrometry (JMM 00287)
S. L. Morgan, A. Fox and J. Gilbert (USA) 57
Announcement 71

No. 2, February 1989

Real-time enumeration of adhering microorganisms in a parallel plate flow cell using automated image analysis (JMM 00288)
J. Sjollema, H. J. Busscher and A. H. Weerkamp (The Netherlands) 73
Experimental approaches for studying adhesion of microorganisms to solid substrata: applications and mass transport (JMM 00289)
J. Sjollema, H. J. Busscher and A. H. Weerkamp (The Netherlands) 79
Preparation of cyanobionts from the apical and mature regions of *Azolla* (JMM 00290)
E. Uheda and S. Kitoh (Japan) 91
Phagocytosis of *Bacteroides* in suspension and on a glass surface determined by a modified fluorochrome assay (JMM 00291)
E. M. Veringa, D. A. Ferguson Jr., D. W. Lambe Jr. and J. Verhoef (USA and The Netherlands) 99
Diffusion characteristics of microbial communities determined by use of oxygen microsensors (JMM 00292)
N. P. Revsbech (Denmark) 111
The use of defined inocula stored in liquid nitrogen for mixed culture chemostat studies (JMM 00293)
D. J. Bradshaw, A. S. McKee and P. D. Marsh (England) 123
Colorimetric detection of microbially excreted lysine directly on agar plates (JMM 00294)
C. M. LiMuti and T. C. Paulson (USA) 129
Calculation of subsurface area of sacculi from low-angle light-scattering measurements (JMM 00295)
A. L. Koch (USA) 139

No. 3, March 1989

A simple method for determining the outer membrane permeability of gram-negative bacteria in intact cells (JMM 00296)
T. Nakae, H. Yoneyama and J. Ishii (Japan) 151
Experimental and mathematical procedures for comparing N_2-fixing efficiencies of rhizosphere diazotrophs (JMM 00297)
T. Heulin, M. Rahman, A. M. N. Omar, Z. Rafidison, J. C. Pierrat and J. Balandreau (France) 163
Comparative study of coliform-enumeration media from seawater samples (JMM 00298)
M. J. Avila, M. A. Moriñogo, R. Cornax, P. Romero and J. J. Borrego (Spain) 175
Comparison of four methods for extracting periplasmic proteins (JMM 00299)
S. D. Lall, B. E. Eribo and J. M. Jay (USA) 195
Simple method for small-scale disruption of bacteria and yeasts (JMM 00300)
W. Hummel and M.-R. Kula (FRG) 201
Quantitative extraction and purification of exopolysaccharides from *Klebsiella pneumoniae* (JMM 00301)
P. Domenico, D. L. Diedrich and B. A. Cunha (USA) 211
Assay of sulfur as triphenylphosphine sulfide by high performance liquid chromatography: application to studies of sulfur bioproduction and sulfur in marine sediments (JMM 00302)
B. F. Taylor, T. A. Hood and L. A. Pope (USA) 221

No. 4, June 1989

Comparison of the Merckoquant 10007 nitrite test strip with conventional reagents in the detection of nitrate reduction by bacteria
C. K. Mills, C. Afable, C. Candanoza, V. Ferreira, S. Landon, A. Repaske, J. Scully and R. Gherna (USA) 233
Use of ELISA for fungal biomass measurement in standing-dead *Spartina alterniflora* Loisel
R. D. Fallon and S. Y. Newell (USA) 239
A simple method for estimating oral microbial levels
M. Rosenberg, M. Barki and S. Portnoy (Israel) 253
Enumeration and sizing of aquatic bacteria by use of a silicon-intensified target camera linked–image analysis system
A. W. David and J. H. Paul (USA) 257
Methods for recovery of deep terrestrial subsurface sediments for microbiological studies
T. J. Phelps, C. B. Fliermans, T. R. Garland, S. M. Pfiffner and D. C. White (USA) 267
Possible misconceptions about O_2 consumption and CO_2 production measurements in stirred microbial cultures
P. C. van der Aar, A. H. Stouthamer and H. W. van Verseveld (The Netherlands) 281
A new and rapid method for the isolation of K^- isogenic mutants from *Klebsiella pneumoniae*
S. Merino, B. Ciurana, E. Sabater and J. M. Tomás (Spain) 287
Urea turnover in a coastal marine sediment measured by a ^{14}C-urea short-term incubation
B. Aa. Lund and T. H. Blackburn (Denmark) 297
Comparison of reduction methods for gas chromatographic–mass spectrometric identification and quantitation of uronic acids in acidic polysaccharides
E. Quintero, K. Ishida, G. Gordon and G. Geesey (USA) 309
A staining technique to measure capsular polysaccharides of *Staphylococcus aureus* on filter membranes
T. Mattila (Finland) 323
The oxidase reaction of *Pasteurella multocida* strains cultured on Mueller–Hinton medium
M. Grehn and F. Müller (Switzerland) 333
Determination of microbial cell concentration based on total cellular C analysis
N. Kawabata and K. Nakagawa (Japan) 337
Determination of adenine nucleotides in soil by ion-paired reverse-phase high performance liquid chromatography
Q. Y. Bai, L. Zelles, I. Scheunert and F. Korte (FRG) 345
